

# Northern Corridor Improvements

## Rosedale bus station

- Auckland Transport is investigating a new bus station in Rosedale on the new Northern Busway extension.
- The type of station is still under investigation, with AT looking at a number of parking options within the station footprint.
- Similar to Smales Farm, it is expected that the new station will be a destination station for the many people who work, go to school or attend sporting activities in the area.
- It will also provide another station to catch express services to and from the city.
- The Transport Agency is also working with AT to look at local road improvements and additional feeder bus services that could help transport people in and out of the station from the East Coast Bays, North Harbour and Albany.
- As part of the NCI project, the existing Constellation Bus Station will be upgraded to allow for buses to continue their journey further north to Albany, along the new Busway extension.

### Our feedback questions:

- What do you like or dislike about this proposed station?
- If you were going to use this station, where would you be travelling to and from?

# Northern Corridor Improvements

## Walking and cycling

- The NCI project includes over 5km of shared walking and cycling paths alongside the Northern Busway (SH1), all the way from Oteha Valley Road down to Constellation Drive and then across and along SH18, joining up to the new cycle paths on Albany Highway.
- As part of the project, the Transport Agency is working with AT to investigate what other paths could be prioritised in the area to form a great network.
- The first new connection underway as part of the NCI project is a walking and cycling bridge across the motorway (SH1) to connect Pinehill and East Coast Bays residents with the Albany metro area.

### Our feedback questions:

- What features would encourage you to use these new walking and cycling paths?
- What would discourage you from using these walking and cycling paths?
- Where would you like to see connection points to access these new walking and cycling paths?
