

## Information on the St John AED (Defibrillator) Units.

Make sure you choose the right AED Unit for your situation.

**The St John FRx AED Unit;** first unit. This is our high spec unit; it can be kept in a vehicle, on a boat, or placed in an outside cabinet; making it available 24/7. Built for the more extreme environment.

The price is normally \$2,995.00 excl. gst. However, purchasing through Business North Harbour there is a 15% discount; making your FRx Unit only \$2,546 excl. gst.

**The St John HS1 AED Unit;** second unit. 'The inside' AED; built to go inside homes, office buildings, clubrooms, or warehouses (it can be used outside); but is normally stored indoors.

The price is normally \$2,495 excl. gst. Again, purchasing through Business North Harbour there is a 15% discount; making your HS1 Unit price only \$2,121 excl. gst.

## With St John you're not just getting an AED Unit, but an AED package.

### This package includes;

- ✓ A free 15 – 20-minute AED training demonstration if you are in the Auckland region
- ✓ AED Unit comes with your first set of pads and battery already installed (which means no servicing required for the first 2 years!)
- ✓ You'll be automatically added to our maintenance programme  
St John sends you service reminders for the life of your AED Unit.  
(No ongoing service contract required)
- ✓ Free AED Signage, AED sticker and instruction manual
- ✓ An emergency semi-rigged water-resistant carry case
- ✓ A patient pre-kit which includes; shear scissors, body-wipes, gloves, and razor
- ✓ A CPR/AED tutorial app (free to download from the app store)
- ✓ It's a St John Ambulance that will respond when you ring 111 to report a heart attack  
Buying a St John AED means you are also helping fund the St John Ambulance Service
